

## C E Mark

The Construction Products Regulations (CPR) becomes mandatory 1 July 2013 after that date all Construction Products which are covered by a Harmonized European Standard (“hEN”) will need to have:

1. A CE Mark
2. A Declaration of Performance (DOP)

Masonry Units are covered by EN 771 Series of Harmonized Standards.

It is not practical to CE Mark the individual blocks or attach paperwork to the packs, therefore every delivery ticket will carry the CE Mark together with an individual block code for each product which is to be used to identify the relevant ‘Declaration of Performance’ on our website, which can be printed off or saved as required.
